AI PRODUCT & TECHNICAL SKILLS

AI Product & Strategy: ML Lifecycle Management, 0-to-1 Product Delivery, GTM Strategy, AI Explainability (HITL), Roadmap Prioritization (MoSCoW), Stakeholder Management, Agile/Scrum

ML & AI Tech: TensorFlow, PyTorch, Scikit-Learn, Keras, NLTK (NLP), OpenCV (Computer Vision), RAG Architecture

Data & Cloud: Apache Spark, Kafka, Airflow, Snowflake, Hadoop, AWS, Azure, ETL Pipelines, CI/CD, SQL, Python, Java

PROFESSIONAL EXPERIENCE

Visa Inc.

Austin, TX

Senior Data Engineer / Technical Product Lead

June 2022 – Dec 2024

- **Led 0-to-1 Product Strategy & Global Rollouts:** Spearheaded technical product execution for the Latin America rollout of Visa Protect for A2A payments. Translated complex ML requirements into a scalable fraud pipeline processing 600M+ real-time transactions, securing a client contract projected at \$20B over 5 years.
- **Drove Market-Defining Business Impact:** Owned end-to-end product lifecycle for Pay.UK AI fraud pilot. Orchestrated ingestion and modeling of billions of transactions, identifying 54% of undetected fraud rings and validating a £330M/year savings value proposition.
- **Empowered Stakeholders via Internal Analytics Products:** Owned development of internal data products, including a dynamic 3D Network UI and customized EDA dashboards. Empowered Data Science teams to visually navigate complex networks, discovering 30+ novel fraud schemes.
- **Productized Scalable Infrastructure:** Led technical implementation for ANZ partnership and standardized global PoC onboarding. Managed full deployment stack and bridged technical scoping with Cybersecurity to navigate stringent Data Security Requirements (DSRs).

BISAG

Gandhinagar, India

Data Science Research Intern

Jan. 2019 – April 2019

- Developed 0-to-1 prototype for a Self-Driving Car; implemented Object Classification and Edge Detection using Arduino and Raspberry Pi.

AI PRODUCT PROJECTS

Phool AI – Empathic Garden OS | *RAG, Multimodal LLMs, Vector DB (Pinecone)*

In Development

- Conceptualized a botanical OS by identifying market gaps in empathic AI; defined a roadmap integrating real-time utility with gamified retention loops (Plant Health Score) to disrupt a \$15B market.
- Architected a weather-synched data pipeline leveraging RAG to deliver hyper-local care; integrated Spotify APIs for bio-acoustic growth stimulation and designed "Phool Reels" for automated social sharing.

PantryPulse – Zero-Spend Inventory Engine | *Computer Vision, NLTK, Python*

2026

- Spearheaded the 0-to-1 vision for an AI inventory app to solve "Kitchen Paralysis"; defined target personas and competitive moats using the "Crossing the Chasm" framework.
- Architected a 3-phase release roadmap and validated technical requirements for a CV and NLTK-driven ingredient ingestion pipeline; de-risked core assumptions via low-cost validation experiments.

Autonomous R.C. Car | *Deep Learning, Keras, OpenCV, Raspberry Pi*

2019

- Engineered a fully autonomous car using Arduino and Pi-Camera; trained models for Lane Finding, Road Curvature Detection, and Traffic Rule detection with 87%+ object detection efficiency.

EDUCATION

University of Texas at Arlington

Arlington, TX

Master of Science in Computer Science | Major GPA: 4.0/4.0

Dec. 2021

CS Institute of Technology (CSPIT)

Changa, India

Bachelor of Engineering in Electronics and Communication | CGPA: 9.1/10

April 2019

CERTIFICATIONS & CONTINUOUS LEARNING

Product Leadership: AI Certified Scrum Product Owner (CSPO) | Product School Micro-Certs (AI, Strategy, Analytics)

AI Architecture: Oracle Certified Generative AI Professional (OCI '25) | AI Autonomous Agent Accelerator (DataCom)
